

DrainPro

Drain Dosing system

The DrainPro Series provides worry free, reliable chemical dosing in a wide variety of applications. These durable systems are designed to be used for drain and grease trap maintenance to ensure they remain free-flowing and odor free. DrainPro saves kitchen operators time and money by helping minimize costly clean out procedures due to waste build up.

The DrainPro Series automatically delivers chemical at programmed timed intervals, at any point day or night. The simple programming allows for up to 48 scheduled events per day, minimizing waste.

DrainPro Series features quick installation and low to no maintenance. The units are available in either direct AC power connection or battery versions. DrainPro can also be used with enzyme drain products.

DrainPro Series

Features & Benefits

- Perfect for applications where intermittent time dosing is needed Ideal for Enzyme products
- Nema IP65 rated enclosure for wet, humid environments
- Digital, backlit display and timer
- Standard EPDM squeeze tubes with pre-assembled hose barb fittings
- 48 programmable events per 24 hours

Specifications

- Power supply: 2x 12V lantern Battery or 100-240VAC 50/60Hz
- Flow rates: up to 5oz/min
- Power Consumption: 3.5W
- Max Pressure: 1.5 PSI
- Class 2 electrical connections, no ground needed
- Outputs available for optional low level sensors

Equipment Description
