LavoWare Warewashing Solutions

Dosing Equipment For Dishwashers

The LavoWare Series features convenient, state of the art warewash chemical dispensing solutions. The versatile, intuitive design can be configured to dispense up to 3 chemicals, either for all liquid products or a solid detergent with two liquid products. The LCD display enables easy setup and installation and the units require little to no maintenance. The LavoWare series offers digital display or analog mode in a Nema 4X protected enclosure.

The LavoWare series can be used with single rack door style or conveyor dishwashers. Choose between standard conductivity probes or the optional inductive probes for highly accurate detergent dosing. It is suited for use in kitchens, restaurants, hotels, bars, snack bars, and more.
