

# Clean Jet Series

## Get to know one of the most versatile cleaning systems on the market

Clean Jet Series can easily clean, rinse, sanitize or deodorize a wide range of surfaces and areas.

CleanJet Foaming solutions are water and air operated, and produce a dry, thick foam, providing optimal working time on the surface. Simply connect an inlet water and approved air hose, set pressure gauges, and start foaming. Or choose the airless foaming/spraying option.

The CleanJet Series features a full line of metering tips to fit any dilution rate for concentrated cleaners.

### Features & Benefits

- > Cleans a wide variety of hard surfaces
- > Integrated air and water gauge
- > 3 functions: Spray, Foam, and Rinse
- > Fully interchangeable components for easy maintenance
- > Installation kits and metering tips included

### Specifications

- > Flow rate from 0.85 GPM (Foam) to 2.5 GPM (Spray)
- > Max Working Temperature of 130° F
- > Rinse Max: 85 (PSI), 6.5:1 (Dilution), 4.2 GPM
- > Product Max: 22 (PSI), 1429:1 (Dilution), 2.4 (GPM)
- > Optional Kit: 1-2.5 (GPM), 339:1-6:1 (Dilution), 20-80 (PSI)

### Optional Air Regulator Attachment

### Clean Jet Auto Scrubber Filler

With a different hose attachment, Clean Jet becomes an Auto Scrubber filler to fill floor scrubbing machines of any type and size with accurately diluted chemical.

### Custom labeling for brand and chemical available
