

CleanJet

Auto-Scrubber Filling Solution

The CleanJet Auto-Scrubber Filling Solution is ideal for filling auto-scrubber machines of all sizes. The units are water operated and feature a heavy-duty hose and simple, intuitive gun attachment. There is no need for an electrical connection; simply connect inlet water and start filling.

The CleanJet System features two chemical inlet ports and a wide range of metering tips to fit just about any dilution rate for concentrated cleaners. The ergonomic design of the central dial makes switching between functions easy.

When the filling process is complete, simply hang the hose directly on the unit - no extra parts are necessary.

Simple and reliable, the CleanJet system requires little to no maintenance, making it the perfect choice for cleaning professionals everywhere to fill automatic floor scrubbing machines.
